AI Engineer

+212 781 48 97 59

Rabat, Morocco

ABOUT ME

I am a final-year Big Data and AI engineering student driven by curiosity and purpose. I enjoy solving complex problems through teamwork, creativity, and clear communication. My strength lies in bridging the gap between data and people translating technical challenges into practical, human-centered solutions. Known for my adaptability, critical thinking, and sense of initiative, I thrive in dynamic environments where innovation and collaboration drive real impact.

SKILLS

- **Machine Learning & Algorithms:** Regression, Trees/Ensembles (RF, XGBoost), SVM, KNN, Naive Bayes, Clustering (K-Means, DBSCAN), PCA
- **Deep Learning & NLP:** PyTorch, TensorFlow, Hugging Face, Transformers, CNNs/RNNs, RAG, embeddings, fine-tuning, prompt engineering
- **Computer Vision & GenAI:** Image classification, object detection, OCR, multimodal & generative AI
- **AI Agents:** LangChain, LangGraph, n8n, multi-agent systems, MCP
- **Deployment & MLOps :** FastAPI, Flask, Docker, Kubernetes, MLflow, CI/CD
- **Programming & Tools:** Python (Scikit-learn, PyTorch, LangChain), SQL, Scala, AWS/GCP/Azure, Tableau, Power BI
- **Big Data & Pipelines:** Spark, Hadoop, Kafka, Airflow, NiFi, MapReduce, ETL/ELT, Databricks, Hive.
- **Databases & Storage:** MongoDB, Cassandra, Elasticsearch, Redis, Snowflake, Data Lakes/Warehouses, MiniIO
- **Microcontrôleurs & SBCs :** Arduino, Raspberry Pi

AWARDS AND CERTIFICATIONS

- **AI Summer School 2025 – Certificate of Completion, INPT Rabat**
Team AIDEX: multimodal emergency-AI demo; jury “Coup de Cœur.”
- **AI Summer School 2025 – Certificate of Appreciation, Al Akhawayn University (AFRETEC)**
- **UConn – Entrepreneurship through an Abrahamic Lens (Virtual) – Certificate of Completion, UConn Abrahamic Program**
- **UConn Abrahamic Hackathon – 2nd Place:**
Household Water Consumption Analysis & Control, University of Connecticut.
- **HackAI Hackathon 2025 – Certificate of Attendance**
1337AI: Participated with ZiraaTech; built a multimodal RAG assistant.
- **Robotics Competition Certificate:**
For designing and competing with a line follower robot in an academic competition.
- **Oracle Academy Award:**
For successfully completing the Database Design and Programming with SQL course.

LANGUAGES

- English: Fluent
- French: Fluent
- Arabic: Native

EDUCATION

Engineering Cycle in Computer Engineering, Specialization in Big Data and Artificial Intelligence, 2nd Year

Université Internationale de Rabat (UIR), Morocco | 2024 - Present

CTI-accredited Engineering Program (Commission des Titres d'Ingénieur)

BSc in Artificial Intelligence Engineering

Cyprus International University, Nicosia, Cyprus | 2020 - 2024

High School Diploma

Option : Physics-Chemistry

Groupe scolaire OLM. Souissi, Rabat, Morocco | 2018 - 2019

EXPERIENCES

AI Engineer - Internship

Cleverlytics, Benguerir, Morocco (UM6P) | 06/ 2025 – 09/ 2025

- Designed and developed a WhatsApp-based AI chatbot for the Moroccan Social Support Program, integrating FastAPI RAG, data anonymization, and cloud speech services (STT/TTS), enabling secure text and voice interactions with low-latency responses.

Data Analysis and Fraud Detection via AI - Internship

General Tax Administration, Rabat, Morocco | 07/ 2023 – 09/ 2023

- Coordinated ETL processes for VAT fraud detection using Toad SQL, IBM Cognos, and Python, applying ML models (XGBoost, Decision Trees, SVM, Naive Bayes) for taxpayer behavior analysis.

PROJETS

Cloud-Based DataOps & MLOps Pipeline for Real-Time Bitcoin Analytics | 2025

- Designed and deployed a cloud-based DataOps & MLOps pipeline on Google Cloud Platform (GCP) using Docker Compose and PostgreSQL for automated data ingestion (Airbyte), transformation (dbt), and validation (Great Expectations).
- Implemented workflow orchestration with Apache Airflow and ML experiment tracking with MLflow, integrating JupyterLab for feature engineering and model training on real-time Bitcoin data.
- Built interactive dashboards in Metabase for data visualization and monitoring, ensuring end-to-end automation, scalability, and reproducibility across the entire ETL-ML lifecycle.

ZiraaTech: Agriculture | 2025 - Present

- Developed a personalized AI chatbot for farmers, storing individual farm data in MongoDB and retrieving Moroccan agricultural insights from websites via RAG with Pinecone for efficient vector search.
- Enabled speech-based Q&A in Moroccan dialect (Darija) with speech-to-text and text-to-speech processing, integrating a Weather API for real-time farming guidance.
- Integrated AI agents (LangChain, n8n) to coordinate RAG, APIs, and speech services, providing context-aware assistance for farmers.

Capstone Project : AI Prosthetic Hand Control via The Peripheral Nervous System | 2023 - 2024

- Designed a prosthetic hand with AI-based recognition using EMG, integrating AI models (KNN, ANN) to mimic natural movements using TensorFlow Lite.
- Prototyped and tested the functionality of the hand through 3D printing and microcontroller programming, including Raspberry Pi and Arduino.
